Education

University of Southampton

Sep. 2025 – May 2028

Bachelor of Science, Computer Science – 1:1 (Predicted)

Southampton, UK

- *Modules:* Data Management (SQL), Computer Systems, Programming (C, Python), Discrete Mathematics
- *Coursework:* Data Management – 92%, Programming II – 91%, Programming I – 82%, Technical Report – 72%

Experience

Southampton Marine and Maritime Institute (SMMI)

Jun. 2026 – Sep. 2026

Software Engineer Intern (12-Weeks)

Southampton, UK

- Built a relational SQL database now used by 300+ researchers to centralise project, organisation, and partnership data.
- Worked on an ArcGIS Online integration enabling interactive geospatial visualisation of project data.
- Developed a web-based data entry form for administrators to submit and update project records.
- Produced system documentation to ensure long-term platform maintainability and scalability.

Deloitte

Apr. 2026

Spring Intern – Advisory

London, UK

- Produced advisory recommendations on strategy, technology, and cyber risk for a mock music publisher.
- Presented on operational vulnerabilities, AI risks, and strategic growth to 60+ people incl. senior managers.

Morgan Stanley

Mar. 2026

Early Insight Series – Investment Management

Remote

- Attended three sessions over two weeks, hearing from senior MSIM leaders on investment capabilities, client strategy, and team operations.

Code Ninjas Teaching

Jun. 2024 – Jul. 2025

Programming Instructor

Maidenhead, UK

- Taught students aged 5–16 programming, from block-based coding to JavaScript and C# development.
- Led presentations and summer workshops, using gamification to engage students of all ages.

PwC

Jul. 2024

3-Day Insight Program

Remote

- Completed case studies across audit, consulting, and deals to build broad commercial awareness.
- Presented a sustainability proposal to a mock client panel, balancing cost, impact, and viability.

Thales Group

Jun. 2022 – Jul. 2022

Work Experience (2-week placement)

Reading, UK

- Rotated across divisions, observing how engineering and management collaborate within a large defence organisation.
- Shadowed a software engineer using MATLAB to develop aircraft detection algorithms.

Projects

Stock News Sentiment Analyser | [GitHub](#) | *Python, Streamlit, FinBERT, Plotly, NumPy, Pandas*

October 2025

- Built a Streamlit app to compare financial news sentiment against 14-day NYSE stock price movements.
- Integrated FinBERT to classify sentiment across up to 100 news articles per query, fetched via NewsAPI.
- Implemented request and model caching to improve performance and eliminate redundant API calls.
- Processed data in Pandas/NumPy, visualised trends in Plotly, and computed Pearson correlations.

Geography Game Web App | [terrivia.com](#) | *Node.js, Express, D3.js, JavaScript, HTML/CSS*

June 2025

- Built a full-stack Node.js/Express app with a JavaScript frontend, deployed live at terrivia.com.
- Integrated a zoomable D3.js world map with custom event handling for country selection and feedback.
- Designed a RESTful API to manage game data and difficulty modes, keeping answer logic server-side.
- Built an adaptive difficulty system with country filtering, clue selection, and time-decay scoring.

Technical Skills

Languages: Python, HTML/CSS/JavaScript, SQL

Developer Tools: VS Code, Node.js, npm, Git/GitHub, PyCharm

Technologies/Frameworks: Express, UNIX, D3.js, Pandas, NumPy, Plotly, Streamlit, ArcGIS Online

Finance Skills: Data and Trend analysis, Personal Investing (4 years), PowerPoint, SQL, Data Visualisation
