Education

University of Southampton **Sep. 2025 – May 2028**

Bachelor of Science, Computer Science – Predicted First Class Honours *Southampton, UK*

- *Modules:* Data Management (SQL), Computer Systems, Programming (C, Python, Java), Algorithmics
- *Coursework:* Data Management – 92%, Programming II – 91%, Programming I – 82%, Technical Report – 72%

Experience

JPMorgan Chase **Oct. 2026**

Explore Bournemouth – Insight Event *Bournemouth, UK*

- Selected as **1 of 30** out of over **800** applicants
- Discussed engineering challenges with managers, incl. scaling payment systems for instant, 24/7 transfers.

Southampton Marine and Maritime Institute | smmilivinglab.geodata.soton.ac.uk **Jun. 2026 – Sep. 2026**

Software Engineer Intern (12 weeks) *Southampton, UK*

- Built a relational SQL database now used by **300+** researchers to centralise project, organisation, and partnership data.
- Shipped a public-facing mapping website to visualise project locations as filterable, clustered geospatial pins.
- Developed a **React, TypeScript** data entry form for administrators to submit and update project records.
- Produced system documentation to ensure long-term platform maintainability and scalability.
- Built a **FastAPI** and SQLAlchemy backend to handle authentication, serve project data and support geospatial queries.

Deloitte **Apr. 2026**

Spring Intern – Advisory (Received return offer) *London, UK*

- Selected as **1 of 50** out of over **6000** applicants (**0.8%**)
- Produced advisory recommendations on strategy, technology, and cyber risk for a mock music publisher.
- Presented on operational vulnerabilities, AI risks, and strategic growth to **60+ people** incl. senior managers.

Code Ninjas Teaching **Jun. 2024 – Jul. 2025**

Programming Instructor *Maidenhead, UK*

- Taught students aged 5–16 programming, from block-based coding to JavaScript and C# development.
- Ran 1-3 day summer coding workshops for groups of **30+ students**, using game-based challenges to teach core programming concepts.

Projects

Tap-to-pay Android Wallet | GitHub | *Kotlin, Jetpack Compose* **July 2026**

- Built a Kotlin wallet demo where a card's balance is charged by tapping an NFC tag that's been programmed in the app.
- Implemented NFC reader mode with a private MIME record so only app-written tags are read.
- Persisted card data locally with Preferences DataStore, keeping balances intact across uses.

Chess Agent - Adversarial Search | GitHub | *University Coursework* | ***Python*** **October 2026**

- Built a agent for a 5x5 chess variant using minimax, alpha-beta pruning, iterative deepening and quiescence search.
- Designed a heuristic evaluation (material, centre control, mobility) with a transposition table and time-budgeted search.

Stock News Sentiment Analyser | GitHub | *Python, Streamlit, FinBERT, Pandas* **October 2025**

- Built a **Python** Streamlit app to compare financial news sentiment against 14-day NYSE stock price movements.
- Integrated FinBERT to classify sentiment across up to **100** news articles per query, fetched via NewsAPI.
- Processed data in **Pandas/NumPy**, visualised trends in Plotly, computed Pearson correlations and cached API calls.

Terrivia - Browser Geography Game | terrivia.com | *Node.js, Express, D3.js, JavaScript, HTML/CSS* **June 2025**

- Built a full-stack Node.js/Express app with a REST API keeping answer logic server-side, deployed live at terrivia.com.
- Integrated a zoomable D3.js world map with custom event handling for country selection and feedback.
- Built an adaptive difficulty system with country filtering, clue selection, and time-decay scoring.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, Kotlin, C, SQL, HTML/CSS
Frontend: React, D3.js, Vite.js, Tailwind CSS
AI/LLM Engineering: Gemini API, Prompt Engineering, Structured Outputs, LLM Workflows, FinBERT
Backend and Data: Node.js, FastAPI, SQLAlchemy, PostgreSQL/PostGIS, Pydantic, REST APIs
Developer Tools: Git/GitHub, Docker, npm, Linux, Vitest, Claude Code, Copilot, Codex
Interests: Motorsports, Running, Film, Mountaineering, Agentic AI
